

SURESH UPPE

Senior Data & BI Analyst | Power BI · SQL · Python
+91 95736 13 995 | uppe.suresh@outlook.in | Hyderabad, India | linkedin.com/in/uppe131995

PROFESSIONAL SUMMARY

Senior Data Analyst with 8 years of experience designing, developing, and optimizing end-to-end Business Intelligence solutions using Power BI, Tableau, and Microsoft Fabric for global stakeholders across cybersecurity, audit & assurance, global service desk, and operations domains. Proven expertise in building scalable data models, writing complex DAX measures, and delivering high-performance dashboards aligned to enterprise risk, compliance, and KPI reporting needs. Skilled in integrating data from SQL Server, SharePoint, and ServiceNow; automating reporting pipelines; and applying Python (logistic regression) for sentiment analysis. Adept at collaborating with senior leadership across global regions to define KPIs, standardize reporting processes, and drive data-driven decision-making.

TECHNICAL SKILLS

BI & Visualization: Power BI Desktop & Service, Tableau, DAX, Power Query (M), Microsoft Fabric

Data & Databases: SQL (SQL Server, MySQL), Excel (Advanced), Data Modeling (Star Schema)

Integration & Automation: SharePoint, Power Apps, Nintex, Automated Report Delivery, Data Refresh Scheduling, ServiceNow

Analytics & Programming: Python (pandas, logistic regression, sentiment analysis), Statistical Analysis, Survey Analytics

Governance & Compliance: Row-Level Security (RLS), GRC Metrics, KRI Reporting, Risk & Compliance Reporting, Audit Assurance, Data Governance

Workflow & Delivery: Agile (JIRA), Stakeholder Reporting, Cross-functional Collaboration, QA Frameworks

PROFESSIONAL EXPERIENCE

Wells Fargo

Mar 2025 – Present

Senior Information Security Analyst

Hyderabad

- Developed and delivered comprehensive monthly international Power BI reports for global regions, covering RA & KRI scorecards, Metric Trends, Phishing, Education & Awareness, RCSA, Exceptions, DLP, IAM, Policy Adherence, Issue Management, and Vulnerability Management.
- Automated monthly reports using scheduled refresh methods and created data pipelines in Microsoft Fabric to pull data from respective storage areas.
- Performed quality assurance reviews on exceptions and third-party Power BI reports by validating data flow, transformation logic, and ensuring maximum accuracy.
- Created QA frameworks and reports to assess adherence to internal control procedures, ensuring teams-maintained evidence and documentation aligned with compliance requirements.
- Collaborated with cross-functional security teams to enhance reporting standards, streamline data validation processes, and improve governance of enterprise risk and compliance metrics.

Deloitte

Dec 2022 – Mar 2025

Senior Analyst

Hyderabad

- Collaborated with senior leadership across global regions to collect, analyze, and report learning and audit assurance data.
- Developed and deployed data collection forms using Nintex and Power Apps, distributed them to global leaders for data submission, and centrally stored responses in SharePoint for reporting and analysis.
- Built reports and dashboards in Power BI and Tableau to generate actionable insights for leadership teams.
- Deployed learning reviews and pulse check surveys, analyzed responses, and created insight reports to support content development and program improvements.
- Developed an internal timesheet system in SharePoint integrated with Power BI, providing weekly and monthly insights on project utilization and hour tracking.
- Created L1 and L3 learning module reports to track module effectiveness and learner engagement.
- Applied Python logistic regression for sentiment analysis on survey and feedback data.

DXC Technology

Jan 2020 – Dec 2022

Associate Professional SDC

Bangalore

- Created monthly service desk reports for multiple global clients using ServiceNow data including incident numbers, issue descriptions, and resolution details.

- Cleaned and transformed raw service desk data using Excel and Python to identify products and issues from short and long descriptions.
- Supported the META automated tool by providing training data inputs and defining output requirements, enabling automated ticket classification based on historical data.
- Built Power BI dashboards and reports for each client, presenting service desk performance metrics and trends. Recognized as Xceed Kaizen Champion for process improvement initiatives.

Accenture

Process Development Associate

Dec 2017 – Apr 2019

Hyderabad

- Collected day-to-day production metrics from all teams and updated Weekly Business Reviews (WBR) and Monthly Business Reviews (MBR).
- Built and maintained Excel-based operational dashboards tracking WBR/MBR KPIs for senior stakeholders, consolidating data from 5+ teams into weekly and monthly executive reporting cycles.
- Analyzed large datasets to identify fraud patterns and operational anomalies, contributing to data-driven process improvements.
